PROJECT PORTFOLIO MANAGEMENT

CHANGE MANAGEMENT

OTHER FRAMEWORKS AND METHODOLOGIES

PROJECT MANAGEMENT TRAINING PATH (NEW)

PROCESS AND PROJECT IMPROVEMENT  
FOR BETTER IT GOVERNANCE

---

## WELCOME TO IT GOVERNANCE

---

This is the third edition of our training calendar which is entirely dedicated to high-end seminars and workshops in the field of IT Governance, Process & Project Improvement, Green-IT and methodologies.

As these matters are essential for your organization, we only work with “ADJUGO Certified” teachers having proven hands-on experience in their domain of expertise coupled with strong educational and soft skills.

We are pleased to present to you our new calendar for the period January to December 2009. In a permanent effort to protect our environment, we no longer print the training catalogue. All details can be viewed and downloaded on [www.adjugo.com/seminars](http://www.adjugo.com/seminars).

The major highlights of our new training offer are:

- ✓ Some of our workshops can now be organized off business hours, during evening sessions
- ✓ ISO has adopted IT Governance, “**Standardising IT Governance: ISO 38500**” gives an in-depth overview of the multiple topics covered by this new norm
- ✓ The new “**Analysing Method to improve Processes**” course which is dedicated to those who already know what BPM is but want to perform better
- ✓ A comprehensive training path on **Project Management** targeting Leadership, Team Management, Communication, and Organisational skills. This new course is also available on a step-by-step approach, each 1/2 day’s module covering a specific topic

We hope to welcome you to one of our seminars and workshops and to bring you interesting and innovative views on the world of IT Governance.

Best regards,

Thierry Holoffe  
CEO ADJUGO

Our offices in Brussels

*Process and Project Improvement for better IT Governance*  
[www.adjugo.com](http://www.adjugo.com)

We also provide trilingual (Dutch, French and English) tailored in-house education plans and training sessions on the most popular, related methodologies and frameworks like RUP, PRINCE2®, PMI, ISO 9000, ISO 38500, Function Point Analysis, ITIL and CMMI®.

## ADJUGO - WHO WE ARE

The founders of ADJUGO believe that the need for profitability and agility drives IT organizations and IT departments to manage their IT operations more effectively and more efficiently. The key success to achieving this objective is the rationalization and standardization of processes.

We, at ADJUGO, want to share our extensive experience and expertise in IT management to support you in improving IT Governance (including Green-IT), IT Processes and IT Projects. We do this by providing senior level consultancy, assessment and risk management services, complemented by awareness, training and coaching.

We want to differentiate from our competitors by focusing on providing senior level services only (i.e. at tactic and strategic level). Key words of ADJUGO are experience & expertise, quality, flexibility, professionalism and pragmatism.

Key in all our services is the human aspect. Our services often imply a change management project and this inevitably involves managing the resistance to change of your people. Managing the change and human resources are two critical success factors and hence, are embedded throughout all services that we render.

In summary, ADJUGO helps you in doing better and standardize what you do well, helps you improve processes that need improvement, will contribute to solving problematic projects, and brings innovative software development where it is useful. We will practice careful change management and introduce inspiring and motivating practices, and our experts will share their extensive experience with you and your staff.

## GREEN IT GOVERNANCE

ADJUGO is specialised in providing IT Governance services. Hence, the way we approach Green-IT is also from a governance angle. The framework that we have developed is fully in alignment with our other services and as such, a core part of ADJUGO's core service offering.

Visit our website dedicated to Green-IT Governance: [www.green-ict.com](http://www.green-ict.com) to find out all the details.
