
STANDARDISING IT GOVERNANCE: ISO 38500 (1 DAY)

CobiT, generally known as THE framework for IT Governance will be compared to the ISO-standard for “Corporate Governance of Information Technology”, ISO38500.

What does ISO38500 really contain? How can it help to make IT Governance more efficient? What are the differences and overlaps between CobiT 4.1 and ISO 38500. All such questions will be addressed in this training.

Objectives

CobiT is a comprehensive and complete set of resources, which contains the information that organizations require to adopt IT Governance and a control framework.

ISO 38500 provides guiding principles for directors of organizations on the effective, efficient, and acceptable use of Information Technology (IT) within their organizations.

The objective of this training is to learn how both frameworks can be used to implement IT Governance in your organization.

After this training, you will be able to choose the most relevant components of both frameworks, to implement in your organization.

Benefits

Participants completing this training will be able to:

- Know the differences and overlap between CobiT 4.1 and ISO 38500.
- Make the choice between the component of CobiT and the requirements of ISO 38500.
- Start to implement IT Governance in their organization.

Audience

- Strategy Planners, Auditors, Quality Managers, Risk Managers
- Top Executives and Managers (Business, IT and Facilities)
- Program, Portfolio or Project Managers, Change Managers
- IT Governance consultants

Speaker

Greet Volders is Partner & Managing Consultant at Voquals and is specialized in CobiT, IT Governance and the development of (controls on) IT processes. Voquals was one of the pioneers in Belgium to provide CobiT trainings and to give advice in IT Governance, which has grown to one of the core businesses of Voquals. In addition, Voquals is also specialized in the optimization of internal processes conform to SOX and CMMI.

Since 2002, Greet has been an active member in several development teams for CobiT and was part of the team who created CobiT Quickstart.

In 2004, Greet became an accredited trainer for CobiT.

In 2008, ISACA International has selected Greet as a member of the CobiT Steering Committee.

Content

The training contains the following topics:

- Introduction
 - What is CobiT ?
 - What is ISO 38500 ?
- Details on CobiT 4.1
 - Main components
 - Explanation of these components
- Details on ISO 38500
 - History of ISO 38500
 - Overview of the Requirements
 - The six principles:
 - Responsibility
 - Strategy
 - Acquisition
 - Performance
 - Conformance
 - Human Behaviour
 - Explanation of the meaning & how to interpret these requirements
- Relation, overlap & differences between CobiT and ISO 38500.

Material

The training material provided includes all presentation materials, notes and additional handouts.

- Full copy of CobiT 4.1 can be downloaded via www.isaca.org
- A copy of ISO 38500 cannot be provided since this is licensed by ISO. Information can be found on www.iso.org.

Duration	Price	Reference
1 day	500 €	COB 3

Related Seminars and Workshops

This training can be followed in addition to the 3 other CobiT Trainings :

- CobiT Quickstart (1 day), which gives you all the material to start an IT Governance project.

- CobiT and IT Governance: The Essentials (1day), provides the basic & profound knowledge on all components of CobiT
- CobiT: The Implementation (1 day), which will help you to fully implement IT Governance, with the use of all the components of CobiT.

Other related trainings :

- IT Governance: Trends, Frameworks and Methodologies (1 day),
- SOA Governance and Best Practices (1 day),
- The Benefits of Green It Governance (1 day).

*This course is an addition to the other 3 CobiT trainings
'CobiT Quickstart', 'CobiT & IT Governance: The Essentials'
and 'CobiT: The Implementation'*
